

Ethical Use of AI in Schools

Gaathri Chakka
Rabani Chadha
Tiffany Chen

Josh Karthikeyan
Ariya Mukherejee-Gandhi

Mission

Our mission is to develop a responsible, ethical, and inclusive framework for AI implementation in schools that enhances education while ensuring student safety, equity, and academic integrity. We aim to empower students and educators with AI-driven tools that support personalized learning without compromising ethical ideals.

The Problem

The rapid integration of AI in education presents both opportunities and challenges. While AI can personalize learning, automate administrative tasks, and provide innovative teaching tools, its **unchecked use may lead to issues** such as bias, data privacy concerns, over-reliance on automation, and potential threats to academic integrity. **Many schools lack clear guidelines** on how to implement AI ethically and effectively, leading to inconsistencies in usage and **potential harm** to students and teachers. Our team seeks to address this gap by integrating an educational AI platform into schools with usage restrictions by creating an ethical framework and resource availability.

01

Existing Initiatives & Shortcomings

Existing Initiatives

AI for K-12

- U.S based initiative for creating national guidelines for integrating artificial intelligence into K-12 classrooms
- The five big ideas of AI are perception, representation & reasoning, learning, natural interaction, societal impact

Microsoft's AI for Education Program

- Microsoft integrates AI into educational tools like an AI-powered reading assistance
- Provides educator training & professional development
- Uses AI to support students with disabilities

State of California

Assembly Bill 2876

- Incorporates artificial intelligence literacy and media literacy into California's K-12 curriculum frameworks

California DOE Toolkit

- A toolkit designed to support educators in integrating AI into education effectively and ethically

Shortcomings in Current Efforts

1. No enforcement of a national curriculum
2. Limited implementation and awareness
3. Educators lack AI expertise
4. Keeping up with rapid AI development
5. Technology & Resource Limitations

02

Ethical & Governance Framework

AI Ethics Charter

Transparency	Fairness	Accountability	Data Privacy
Students, parents, and staff will be informed about how AI impacts learning and assessment.	A fairness committee would oversee AI-related complaints and ensure AI upholds equitable learning opportunities.	A dedicated oversight body will monitor AI implementations in schools. This committee can include educators, AI experts, parents, and student representatives.	AI must comply with FERPA and CCPA to protect student informations. AI will collect minimum amount of student data required for learning purposes.
Schools would conduct AI literacy workshops to educate students and parents on AI's capabilities, limitations, and ethical concerns.	Schools should partner with developers to ensure AI tool cater to multilingual and neurodiverse students.	Teachers and administrators must undergo training on ethical AI use, bias detection, and responsible AI decision-making.	Students should have access to their own data and be able to request deletion of unnecessary records.
A report should be available to outline how AI is used in the school system	AI should support, not replace, human judgement.	Schools must provide formal process for reporting AI-related issues (errors, data breaches, and bias)	Parents and students have the right to opt out of AI-based data collection and processing.

Oversight Committee

This committee is responsible for ensuring the ethical, fair, and responsible use of AI in California schools. It will govern, monitor, and provide guidance on AI implementation in education while prioritizing student well-being, transparency, and equity.

There will be 9 roles:

1. Chairperson
2. Deputy Chair
3. Executive Assistant
4. AI ethics Officer
5. Curriculum Specialist
6. Data Privacy & Security Supervisor
7. AI & Technology Expert
8. Legal & Policy Advisor
9. Student & Parent Representatives

Chairperson:

Role: leads committee, sets the agenda, and ensures alignment with California education policies and AI ethics principles.

Responsibilities:

- Oversee AI policy development and implementation
- Act as a liaison between school, policymakers, and AI vendors
- Present report on AI impact, fairness, and data privacy compliance

Curriculum Specialist:

Role: Advises on AI's role in curriculum and teacher training

Responsibilities:

- Ensures AI enhance learning without replacing human educators
- Monitor AI-driven assessment tools to prevent bias.

Oversight Committee

Deputy Chair

Role: supports the Chairperson in overseeing legal & policy advisor, AI & technology expert, and student representatives. Also ensures smooth functioning in these areas, providing guidance and address concerns.

Responsibilities:

- Report regularly to the Chairperson, assisting with strategic planning and decision-making
- Address any conflicts or issues that arises
- Track and report on the progress of projects and initiatives

Executive Assistant

Role: helps assist Chairperson in managing key operational areas, focusing on overseeing AI Ethics Officer, Curriculum Specialist, and Data Privacy & Security Supervisor. The Executive Assistant ensure all areas function efficiently to maintain operational standards

Responsibilities:

- Provide general administrative support such as organizing meetings, preparing documents, and managing schedules
- Regularly update Chairperson on progress and challenges about each area
- Serve as a liaison for smooth information flow between chairperson and operational areas.

Oversight Committee

AI Ethics Officer:

Role: ensures AI system comply with legal regulations, privacy policies, and ethical guidelines.

Responsibilities:

- Conduct regular AI ethics assessments
- Investigate ethical concerns or complaints regarding AI in school

AI & Technology Expert

Role: Evaluates AI models used in education for bias, accuracy, and reliability

- Advise on responsible AI tool selection
- Ensure AI recommendations in education are explainable
- Conduct AI bias and fairness audits

Data Privacy & Security Supervisor

Role: Ensures that student data is protected from misuse and breaches.

Responsibilities:

- Enforce strict data protection policies
- Audit AI tools for compliance with privacy laws
- Provide guidelines on minimizing student data collection

Legal & Policy Advisor

Role: Ensures AI policies align with state and federal laws

Responsibilities:

- Provide legal guidance on AI regulations in schools
- Address legal concerns
- Develop guidelines for AI vendor contracts and ethical compliance

Student & Parent Representatives

Role: Advocate for student rights, ensure AI policies reflect their best interests

- Voice concerns about AI's impact on learning and privacy
- Help assess how AI tools affect student experiences
- Include student and parent perspectives in AI governance
- Fill out surveys to receive feedback about AI implementation.

Flowchart of Governance Structure

03

Strategic Guidelines for Implementation

Strategic Guidelines for Implementation:

Teacher Training Programs:

Literacy courses

- Develop and deliver comprehensive training modules covering AI fundamentals, ethical implications, and practical applications in classroom settings
- Hands-on workshops to empower educators to effectively integrate AI tools into their teaching practices

Ongoing Development:

- Provide updated resources as AI continuous to evolve

Data Audits and Governance:

System Audits:

- Conduct periodic audits to assess data accuracy, privacy compliance, and AI bias
- Use third-party experts to conduct impartial reviews and generate actionable reports.

Data Governance Protocols:

- Ensure compliance with legal standards like FERPA (Family Educational Rights and Privacy Act - protecting privacy of student edu. records)

Stakeholder Engagement:

Communication Channels + Collaborative Decision Making:

- Create digital and in person forums and focus groups that actively involve teachers, parents, students, and community leaders in discussions about AI initiatives
- Use surveys and feedback tools to capture insights and continuously improve the implementation process

AI Pilot Projects:

Adaptive Learning Tools:

- Launch pilot projects in selected schools to integrate adaptive learning platforms that personalize instruction based on real-time data analysis
- Monitor student engagement, performance metrics, and teacher feedback to measure effectiveness

Automation + Evaluation:

- Collect baseline data and conduct follow-up assessments to measure impact.

04

Stakeholders & Budget

Teacher Training & Stakeholder Engagement

Key Focus Areas:

- Developing a modular AI literacy training program tailored to teachers that would reshape education and improve lesson planning and classroom efficiency.
- Modular AI literacy program will enhance comprehension among teachers to integrate AI tools effectively in classrooms.
- Offer a scalable and adaptable curriculum that can be expanded across different schools and districts.

Modular AI Literacy Training Program

Beginner Module: Foundations of AI in Education

- Introduction to AI concepts, history and real world applications
- Understanding AI ethics and its role in decision making.
- How AI can support classroom management and lesson planning.

Intermediate Module: AI Tools and Classroom Applications

- Hands-on training with AI powered tools like adaptive learning platforms, chatbots, and grading automation.
- Best practices for AI assisted student learning.

Advanced Module

- Designing AI enhanced lesson plans.
- Leveraging AI for data-driven student progress tracking.

Budget Allocation Breakdown

Training & Management Development - 150k

Teacher Workshops & Training Sessions - 120k

Technology and Software - 90k

Stakeholder Engagement and Community Outreach - 70k

Evaluation & Miscellaneous Costs - 70k

05

Implementation & Limitations

Timeline & Success Metrics

Month 1-2

- Set up the ethics charter, oversight committees, and stakeholder advisory groups.
- Success Metric: Charter approved and committee members onboard

Month 3-4

- Roll out teacher training programs and initiate data integrity audits.
- Success Metric: 80% of pilot school educators complete training; initial audit reports available

Month 5-7

- Launch pilot adaptive learning and administrative AI projects.
- Success Metric: Improvement in teacher workload (survey results) and measurable gains in student learning outcomes (pre- and post- intervention assessments).

Success Metrics Bar Chart

Timeline Gantt Chart

Potential Barriers & Mitigation Strategies

Resistance to Change

- Reluctance among educators to adopt new technologies due to fear of job displacement
- Skepticism from parents and community regarding AI in teaching

Mitigation

- Inclusive Training Programs
- Stakeholder Engagement
- Pilot Testing

Data Privacy & Security Issues

- Potential non-compliance with privacy laws such as FERPA
- Risks related to the collection, storage, and use of sensitive student and teacher data

Mitigation

- Robust Data Governance
- Compliance Monitoring
- Transparent Communication

Lack of Resources

- Limited high-speed internet connectivity and outdated hardware in some schools
- Insufficient technical support for managing AI

Mitigation

- Infrastructure assessment & upgrades
- Technical Support Systems
- Secure funding or public-private partnerships
